

Get Certified. Stay Compliant.

Forklift & Materials Handling Training

www.fireguard.ie

Why It Matters

Why certification isn't optional:

- Protects your people
- Meets legal & insurance requirements
- Prevents downtime & costly accidents

Training That Matches Your Site

From warehouses to construction sites - we train you on the equipment that keep your operations moving.

What You Can Expect

Training that works in the real world.

- Delivered by RTITB-certified instructors
- Tailored to your site and safety needs
- Certification awarded on completion

Tailored, Practical Training**

Explore the equipment we cover

Counterbalance Forklift
(Up to 5T)

Widely used across warehouses and logistics sites. Ideal for loading, unloading, and moving palletised goods in day-to-day operations.

Counterbalance Forklift
(Over 5T)

Designed for heavier-duty lifting in more demanding environments. Suited to industrial settings where larger, bulkier loads are handled regularly.

Reach Truck

Perfect for narrow aisles and high racking. Designed for precision and efficiency in tight warehouse environments.

Order Picker

Built for stock picking at height. Helps operators safely access and retrieve inventory from shelving or racking.

Pivot Steer

A hybrid of counterbalance and reach truck. Perfect for narrow aisle operations with tight turning radii

Explore the equipment we cover

MEWP (Mobile Elevating Work Platform)

Enables safe access to high-level tasks. Ideal for maintenance, inspection, or installation work at height.

Side Loader

Specialised for transporting long or awkward loads. Common in timber yards, steel stockists, and industrial sites.

Yardshunter (Shunter Truck)

Moves trailers and units within yards and loading bays. Essential for keeping busy logistics operations running smoothly.

Multi-Directional Forklift

Designed to handle long, bulky loads with precision. Moves forward, backward, and sideways – ideal for steel, timber, and piping.

Container Handler

Heavy-duty equipment built for ports and freight terminals. Handles large containers with stability and efficiency.
